TABS IP

For Light Duty Applications

- More Cost Effective
- G60 Galvanized
- Thickness (.016)
- Mortar Tie System
- Limited 20 Year Warranty

TABS IP (I-Panel) is a Light Duty support panel system for projects that do not need to meet heavy duty criteria. It is a cost effective solution with superior quality. In fact, by today's standards, it meets or exceeds other heavy duty exterior panel systems currently being used in the industry.

The Original TABS System was introduced in the mid 1980's and was intended for both exterior & interior use. It was designed to match the thermal movement of the veneer and offered greater fastener pull through resistance. It also addressed the issue of proper spacing with its double tabbed design. The original TABS panel was embossed to make it one of the industry's first moisture control systems. Today, the TABS IP panel offers .016 thick steel, a patented mortar tie and deeper embossing.

TABS IP includes: TABS IP Light Duty Panel, TABS II Adhesive, TABS Mortar Additive, TABS II Rain Screen (optional).

<u>Product Description</u>	<u>TABS IP</u>	<u>TABS II</u>
Intended Use	Light Duty	Heavy Duty
Quality of Steel	Commercial Grade	Structural Grade
Nominal Panel Thickness	.016/ 27 Gauge	.018 / 26 Gauge
Corrosion Protection	G60 Hot Dipped	G90 Hot Dipped
Panel Coating	Thermal Set	Thermal Set
Embossed Steel Panel	Included	Included
Moisture Control	Included	Included
Patented TABS II Tie System	Included	Included
Mortar Mix	Type "S" (Type "N")*	Type "S"
Mortar Additive*	Optional*	TABS II
Adhesive*	TABS II (HD Const)*	TABS II
Fasteners	TABS II Non-Corrosive	TABS II Non-Corrosive
Warranty	Limited Twenty Year	Full Twenty Year
